

MINI 10 CRASH REPAIR SYSTEM

HOLD 'N' PULL - WITHIN 10 MINUTES !!!

FEATURES	BENEFITS
Set of 4 sill clamp	Firm holding of vehicle during pulling operation
Double swivel movement of pulling tower	Better accessibility
Downward pulling attachment	Downward pulling on engine compartment is possible
Pneumo-hydraulic foot pump	Faster and precise pulling operation
Completely dismantable	Saves work space
Electric lift	Faster clamping
Variety of Accessories	Different pulling operations are possible

Jack up the vehicle using the lift (or use a trolley jack) and place on the wheel stand.

Securely tighten the Four sill clamps.

Pulling tower has two movements - Swivel and Rotation. It also has extended height attachments.

Position the MINI 10 under Vehicle.

Vehicle is now clamped to MINI 10 and ready to repair using the hydraulic pulling tower operated by a Pneumatic foot pump.
